

LUMEC

COMPANY PROFILE

INTRODUCTION

LUMEC is a Durban-based consultancy providing socio-economic analyses and solutions for Africa. We are committed to providing analyses that are data-driven and realistic, and solutions that are both practically implementable and sustainable. We are a young company with a fresh perspective that is centred on people and the environment. Our innovative and personalised approach separates us from our competitors. We understand that traditional economic concepts are not providing the results theorised, and this requires a new approach to economic research that will result in a more inclusive and sustainable society. Our methodology is collaborative, transparent and objective and aims to contribute to an economic system that is capable of facing the unique challenges synonymous with this new economic paradigm.

FOCUS AREAS

Our expertise lies within the areas of Maritime & Transport Economics, Development Economics & Urban Planning, Regulatory Economics, the Informal Sector, the Sport & Creative Sectors, and the Tourism Sector. Resource is part of a collective of consulting companies with shared values who are based in Durban. The collective allows us the flexibility to take on both large and small projects and provides additional expertise in the areas of energy and data science. We thrive on the challenges presented by new research questions and new sectors, so please contact us with any projects that may fall outside of our services or expertise listed above.
